

Stroke Inclusion Criteria

STROKE diagnosis code descriptions reported (State requirement)		ICD-10
Nontraumatic subarachnoid hemorrhage (SAH)		I60.00 - I60.9
Nontraumatic intracerebral hemorrhage		I61.0 - I61.9
Other and unspecified nontraumatic intracranial hemorrhage		I62.00 - I62.9
Cerebral infarction		I63.00 - I63.9
And meets one of the following:		
	Was admitted to your facility	
	Died	
	Were transferred out by ground or air ambulance	
	Were transferred in by ground or air ambulance and admitted to a receiving facility	

Non-STROKE diagnosis code descriptions reported by some facilities (Optional)	ICD-10
Transient cerebral ischemic attack, unspecified (TIA)	G45.9

In-House Strokes reported by some facilities (Optional)	
If a patient is admitted for other clinical conditions and subsequently develops a Stroke during their hospitalization, it is not a state requirement for you to enter them into the Stroke registry. It's optional and up to your facility to determine if you should enter and track these patients.
